AMENDMENTS TO THE CLAIMS:

1-21 Cancelled.

22. (Newly Presented) A data communications server system, comprising:
- an information network;
 - means for logging into the information network;
 - a communications portal resident on a server and accessed over an information network to present information associated with an individual implantable medical device patient, comprising:
 - means for allowing a user to log-in to the communications portal;
 - means for making a user verification;
 - means for presenting a customized web page;
 - means for accessing implantable medical device, patient medical records, and patient lab records databases over the information network; and
 - means for integrating accessible databases through user selectable links.
23. (Newly Presented) The data communications server system of claim 22 further comprising a web browser connectable to the communications portal by entering a portal URL.
24. (Newly Presented) The data communications server system of claim 22 wherein the communications portal further comprises a physician welcome interface.
25. (Newly Presented) The data communications server system of claim 24 wherein the physician welcome interface comprises a listing of all implantable medical device patients being treated by a physician.
